

# Valve Packaging

## Why Valve Packaging?

### Full Bag Utilization

No head space or “ears” on the bags.

### No Over-Hang

Reduces bags that hang off the pallet, minimizing risk of rubbing edges or forklift damage.

## Stand Tall With Valve Packaging!

At Ardent Mills, thought leadership and innovation support our core value of **Service** to our customers. We leverage some of the most cutting-edge technologies in the milling industry, including state of the art packaging capabilities. Ardent Mills has invested in valve packaging technology to provide exceptional packaged flour and grains in a format that will better serve your business. We have the largest network in the U.S. and Canada.

### Optimal Palletizing

Delivers tightly packaged bags that fit snug on the pallet.

### Easy Loading and Storage

Easier to load and unload with dollies. The end product stacks nicely onto pallet racks.

### Minimized Waste

Reduces bag leakage.  
\*Customers may experience a decline in un-useable bags.

### Upright Positioning

The bags stand up right for ease of use, and attractive display.

\*Your results may vary.
