RE: Advisory on Allergens: Gluten Facilities

The Ardent Mills facilities listed below produce gluten containing products. Our hazard assessments include a review of allergens as noted in the Food Allergen Labeling Consumer Protection Act of 2004 (“FALCPA”). Our facilities do not store or process milk, fish, crustaceans, tree nuts, peanuts, soy, or egg. Wheat is the only allergen present in the majority of our facilities in the U.S. that produce wheat flour products. The U.S. Food and Drug Administration (“FDA”) questions and answers on FALCPA can be found at the following website: <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/guidance-industry-questions-and-answers-regarding-food-allergens-edition-4>

Note regarding the Food Allergy Safety, Treatment, Education and Research (FASTER) Act that will add sesame as an additional allergen. This act will require labeling for product in commerce by January 1, 2023 for products containing sesame or related products. Ardent Mills does not store or process sesame at our flour mills or other facilities.

Sincerely,
Ardent Mills Regulatory Team
